## Regulated Qualifications – January 2018

### Product Information – Regulated Qualifications

CABWI is a nationally-recognised awarding body that offers competence-based and knowledge-based regulated qualifications. Competence-based qualifications are designed to be undertaken in the workplace. They allow learners to demonstrate their skills by producing evidence from their work activities, to meet the qualification requirements (which are based on national standards). We offer a number of competence-based qualifications for water and utility skills. CABWI's knowledge-based qualifications are designed to provide learners with the underpinning knowledge that supports their job role in the water and utilities industries. They are assessed using question papers, assignments and practical exercises.

Detailed information about CABWI's products can be found on our website [www.cabwi.co.uk](http://www.cabwi.co.uk).
